

How to Make a Zipper Bag

Your kit includes 2 pieces of fabric, 1 piece of fusible web, 1 zipper with charm and instructions.

If you choose a decorative option (option 1 shown below), follow directions accordingly PRIOR to fusing your fabrics together.

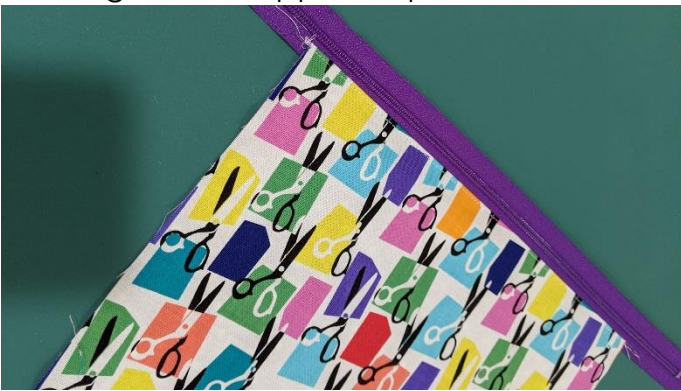

Using the fusible web provided, fuse two pieces of fabric with WRONG sides together.

On the outside (main) fabric, place zipper face down 1/4" from top. Stitch center of zipper tape.

Finger press main fabric (or carefully use iron to not touch the zipper) and top stitch along the edge of the zipper. Repeat at the other end.

With right sides together, fold bag so edge of zipper is approximately 1" down – make sure both edges are even.

Make sure your zipper is open so you can turn your bag right side out. Stitch each edge with $\frac{1}{2}$ " seam.

Trim excess zipper from both sides.

Turn your bag right side out and enjoy!
