

Before Class

Choose which color will be your main color (outside of needle case), your lining (inside cover), and your insert to hold needles. Make a note.

Measure your needle threader to see what size a loop to hold it should be.

Open the sheet labeled -Instructions-

from the sheet, do these instructions:

1- Cut all 3 colors into rectangles 15 cm x 10 cm, or a tiny bit less than 6 in x 4 in. [You can use the 4" x 6" card to make a pattern to cut around.] Cut from one corner so that there is a wide leftover for step 3 circles.

3- From the 2 colors that are NOT the outside, cut circles 1 inch in diameter. You need 3 total. [Use the Decorative Circles pattern to cut the circles. Note: If you do not want to cut into the instruction sheet, make a copy of the page.]

Fold the felt you chose for the outside in half, then mark the center.

4- Cut a strip of felt 2.5 x 1 cm, or 1 x $\frac{3}{8}$ in to hold your needle threader. MEASURE THREADER BEFORE CUTTING. ADJUST SIZE. This will be attached flat to the lining.

Place all supplies and materials together in your project case. Keep the box the kit came in to refer to the photo on the front.
