

Scrapology Challenge Part 3

The scrap challenge continues. From part 2 you should now have several lights and darks cut into triangles from your 5" strips by either using the Spider Web Ruler or the template that was provided. You should also have half square triangles cut from the 4 ¼" or 4 ½" squares.

Note: You may want to cut up more of your stash to make the Lap or Larger quilt. (after all "SMILE", that is our goal.) Let's use up that stash! Trust me, you are going to like the looks of this quilt when you start putting it all together. Enjoy the process and have fun ☺

1. Start assembling pairs of lights and darks from your triangles from the template or Spider Web Ruler. Note: You will place the light triangle on top when piecing and stitch on the right side of the triangles. Press seams to the dark.

For a lap size quilt you will make 116 light/dark sets

For a larger size quilt you will make 220 light/ dark sets

For a quilt that is closer to a queen size you will make 285 light/dark sets

2. Next you will assemble pairs of dark/dark being sure to mix up your print colors for these pairs.

For the Lap size quilt you will make 24 dark/dark sets

For the Larger size quilt you will make 32 dark/dark sets

For a quilt closer to a queen size make 39 dark/dark sets

3. Now for your half square triangles you have cut. You should make sure you have a total of 140 half square triangles for the lap size quilt and for the larger quilt you should have 252. For a quilt closer to a queen size you will need 190 half square triangles.

In April, we will start putting the blocks together.

Be sure to check out www.quilterswindow.com under the tab Scrapology Challenge and you can watch the video on Part 3.
