

Creative Sewing Machines' Workbook based on BERNINA Embroidery Software 7

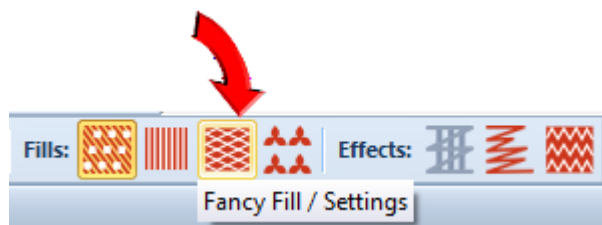

a look you like and then left click to process the design.

As you can see in the **Color Film Docker**, the colors are sequenced so that all the stems will sew first and then the flowers.

FYI: If the design had been grouped when you used the Wreath tool, then the colors would have processed so that each flower design sewed: green-purple, green-purple, green-purple, etc. and you would have had to take the extra step of sequencing by color.

Zoom Factor: To fit

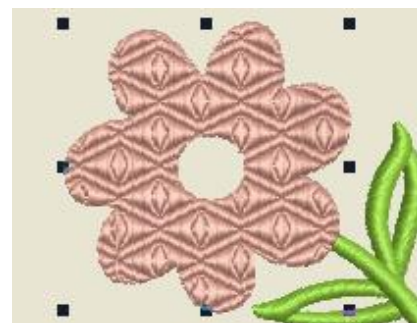

You are going to be working with the **Fill Stitches** on the **Stitch Toolbar** near the bottom on the screen.

Select the top left flower.

Select Color 10 Pink from the Color Palette.

Left click on Fancy Fill.

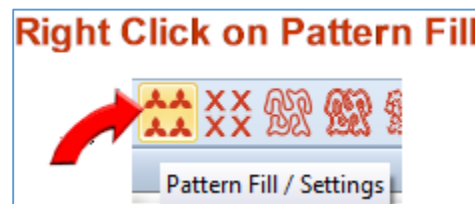

Going Clockwise, **select** the next flower.

Select Color 49 Deep Yellow. The now yellow flower should still be selected.

Right click the Pattern Fill/Settings Icon to open **Object Properties**.

New with Software 7: you don't have to right click on the selected design to open Object Properties. Of course, you still can if you want to.

Fill type is now **Pattern**.

Click the **Select...** button.

The **Select Pattern** dialog box opens.

Click the arrow in the **Patterns Window** and scroll to **Heirloom**.

Click **Heirloom** to select.

There are five little boxes to the right of the Heirloom Window.

The first 3 boxes give you the choice of the different ways you can view the stitch patterns.
