

Prismatic Star 64"x 64" Pre-Cutting Instructions

This is a list of what you will need to have cut and bagged **BEFORE** the 1st Class. It will include the size to cut pieces of fabric so you will be ready to use the Template Layout Sheets from the pattern. You will need **8** gallon size Ziploc bags marked 1-8. Be sure to mark each piece you cut with what color # it is and what unit it is for.

If you are using a Judy Niemeyer/Hoffman 48 piece Bali Pop please leave it sealed. The fabric is in the correct order and you are ready to go!

If you are using another brand of Bali Pop or Jelly Roll that has 40 or 42 pieces. Please make sure to buy extra fabric to have a total of (48) - 2 ½ "by 42" pieces cut and sorted. See below for sorting instructions..

Selecting your own fabrics is definitely an option. You will need a total of (48) - 2 ½" by 42" pieces cut. This can be done by choosing 8 different fabrics. Each is arranged starting from the lightest color being Fabric #1 and finishing with the darkest color being fabric #8. This makes 1 set. You will need 6 of these is color sets with different fabrics. Please put 1 set in each bag. Six individual strip sets are needed to complete one quilt.

Before the 2nd Class please have the following Pre-cutting done:

Accent Fabric #A1:

The black divider strip that sits between each diamond unit is referred to as the accent fabric; you can use any color you like. You will need 1-1/8 yards of fabric.

Cut (3) 13 ½" by 42" for this fabric and put in bag 7.

Background Fabric #B:

Cut (4) 16-1/2" by 42" strips place in bag 8.

Visit us on:

Step 1: Save file to your computer.

Step 2: Open this file in any photo editing software or print (to color by hand).

Step 3: In photo editing software, find the fill tool (usually a little paint bucket).

Step 4: Use either a pattern you have created or a fabric swatch, or a color swatch in desired color.

Step 5: Click on the open space and fill in each area piece by piece.

Helpful Hints: Fabric swatches can often be downloaded from a quilt shop or fabric company's website.

To create a pattern, open a swatch in Photoshop, make sure it is the same "size" in dpi as the line drawing (72 dpi).

Go to *Edit > Define Pattern* and name the pattern the fabric number. Then select the paint bucket tool and start clicking the white spaces inside the black lines.
