News Briefs

-Another Face Lift!!

Just when you could come into our shop and know where what you are looking for is, its no longer where is was a mere few weeks ago.

Yes, the Quilt'n Thyme staff has been busy over the past month re-arranging the layout of the

store to consolidate product categories (thread, patterns, panels, notions, vacuums and accessories, etc.) into single locations rather than scattered throughout the store in a random fashion.

-A Fond "Adieu!!"

We are saddened to announce that Sherry Bishop, our longest-term staff sales associate, has left our store and is in the process of moving out of state. This was Sherry's desired change and we certainly support her in all that she does next – like have a great life!

Beginning in October, the monthly "Know Your Sewing Machine" classes the Sherry has taught over the past years will continue to be scheduled for the third Saturday of every month, with the new instructors being Angela Thornton covering Bernina equipment and Rosemary Ingraham covering other brands of equipment.

-Dispelling the Rumor Mill!!

With all of the changes happening over the past couple of months, it is time to update all of our faithful customers about our future plans. Dan Steigman has taken over Quilt'n Thyme's daily operations due to a family emergency in Josh's life that has forced him to move to Nevada. There has been quite a bit of wondering about our future plans with rumors circulating about the status of our business. Here is the actual situation.

We have just signed a new lease keeping us open until 8/31/2022 at which time we will have to once again have to renegotiate our lease. We could not in good conscience close this store with so many new Bernina customers counting on us for continued service.

We are still a Janome / Elna/ Necchi dealer. While Josh concentrated on the Bernina market, Dan is now ordering some new Janome products and we are tremendously excited about them.

You may have noticed some shortages on some items. Plans are being implented to start to resolve such issues in the next few months.

We will continue to offer full-service to our customers and will seek to be the best at what we are in the North state. There will be much more to come but please know that we at Quilt'n Thyme stand with you and appreciate your continuing support. Please know that the only way a small town store remains open is when customers choose to purchase locally.

QUILT'N THYME SEW & VAC

955 Highway 99W, Suite 115 - Corning, California 96021

Store Hours

Monday 9am-9pm - Tuesday through Friday 9am-5pm - Saturday 9am-4pm - Closed Sunday

Shop Our ETSY Store!

Looking for just the right themed fabric panel for your next quilting project? Visit our ETSY Store at www.etsy.com/shop/quiltnthyme, where we feature over 140+ fabric panels of a multitude of themed patterns. These panels are pre-cut to size and include patterns for cloth books for infants, aprons, placemats, and more.

Our ETSY store also features a wide selection of pre-cut one and two-yard lengths of hard-to-find and out of print fabrics.

Janome MC6700P

The Memory Craft 6700 Professional provides the speed and precision critical to advanced sewing and contains serious features for the serious sewist.

Sewing speeds of 1,200 stitches per minute make the MC6700P the fastest Top Loading Bobbin machine in the industry. The 10" All-Metal Seamless Flatbed provides the perfect work space for projects large and small.

In addition, quilters can enjoy exceptionally smooth quilt piecing with the included AcuFeed™ Flex Layered Fabric Feeding System.

KEY FEATURES

- High Performance Speed: 1200 SPM

Janome introduces an industry first, 1200 SPM (stitches per minute) straight stitch speed for professional grade performance in a convenient, top-loading machine. The 6700P is designed to perform with speed, strength and stability for faster sewing results. A full metal frame and vibration suppression system ensure pleasurable, smooth, high-performance sewing.

- AcuFeed Flex™

Janome's exclusive AcuFeed Flex™ fabric feeding system moves layers of your project together under the needle with perfect precision from both the top and bottom. This feature works great for everything from piecing to hemming to quilting and any sewing requiring precise control.

- Three Needle Plates

The machine comes with a zigzag needle plate, a straight stitch needle plate and the exclusive HP needle plate which is designed to work with the HP foot. Each are etched with helpful guideline markings for precise seams, angles and cornering.

- Professional Grade HP Foot

Utilize this narrow gauge, industrial type foot for sewing curves and precise topstitching for greater ease of control and the superior visibility that it offers.

- LCD Screen

A clear, bright and information-rich 3.6 inch LCD screen provides a clear view of sewing conditions. View stitch selection, suggested sewing foot, recommended tension and foot pressure settings, and feed dog position (up/down) at a glance. Easy to read and adjust.

- One-Step Needle Plate Change

When using one of the three stitch plates that come with the 6700P, it's easy to change out with One-Step Needle Plate Conversion. Simply push the lever to release the plate and snap a new plate in place with no screws or tools necessary.

- Superior Needle Threader

Threading can't get any easier. Set your thread, push the lever, release and sew. The Superior Needle Threader's advanced design feeds the thread through the eye of the needle with precision and accuracy every time.

- Easy Set Bobbin

The specially designed bobbin case and cover means there is no need to pull long thread tails up and through when you thread your machine. Slip the bobbin thread in the cover plate guide and the built in cutting blades trim the tail to the correct length for a super-clean start to your stitching line. After the initial threading, the auto-thread cutter takes care of trimming and re-setting the tails each time.

- Streamlined Design

The seamless, heavy-duty, powder-coated, all-metal flatbed of the MC6700P offers an uninterrupted, large sewing area with 10 inches (255mm) to the right of the needle. Couple this enhanced work space with a streamlined machine head that provides greater visibility around the needle area for a comfortable, ergonomic sewing experience.

- Powerful LED Lights in 3 Places

Extensive LED lighting in 3 places allows for shadow-free work areas, and greater needle illumination for all your finely sewn details.

- 9mm Decorative Stitches

Add gorgeous details to hems, placemats, art quilts, and more with the extra wide 9mm decorative stitching. The 9mm width makes for bold, bright and more distinct design detailing. There are 200 stitches on the MC6700.

- Monogramming and Pattern Combination

In addition to decorative stitches, script and block fonts are available, including multi-language characters. Uppercase lettering can be sized up to 9mm. It is easy to program letter or decorative stitch combinations for custom details, handmade tags or quilt labels. Up to twenty pattern combinations can be stored in memory for future use.

- Creating Buttonholes

Sew matching buttonholes with ease using the included buttonhole foot and stabilizing plate. This plate assists fabric control during buttonhole formation and is perfect for thicker or textured fabrics.

- Stitch Adjustment

Enjoy a precise level of stitch control with rotary encoder dials for the smooth adjustment of stitch length and width. These multi-function dials will also adjust needle drop position and move the cursor for pattern selection.

- Presser Foot Pressure Adjustment

The stepless presser foot pressure dial allows you to fine-tune foot pressure for optimal performance when sewing fine or heavy-weight fabrics. Adjusting foot pressure can also be helpful when free-motion sewing. The exterior placement of the dial and gauge allow for easy, on the fly adjustment as needed.

- Tension Regulating Dial

Active sewists often prefer this outside type tension dial for easy operation, viewing and scalability. It is a precision control inspired by industrial type machines and a hallmark feature of the MC6700P, perfect for setting your stitches just right.

- Applique

A wide variety of stitch options and 91 needle positions make applique on the MC6700P precise and fun. Choose any look from near invisible stitching to bold ladder stitches in a variety of thicknesses.

- Programmable Direct Stitch Selection

The direct stitch selection keys on the front of the machine are pre-programmed with commonly used stitches, but have the added advantage of being able to be custom programmed for your favorite stitch patterns. Your selections are easy to reference on the bright LCD screen and are saved for future sewing sessions. It's easy to return to default settings or change up your custom menu.

- Responsive Foot Control

The extra large foot control offers slip-free, comfort and responsive performance. Pictured with the optional thread cutter switch and base plate. By increasing pressure on the foot control, sewing speed increases. Perfect for slowing down in detailed areas and picking up speed on the straight-away!

- Upstanding Dual Thread Stand

The upstanding, dual thread stand with the fold up thread guide bar allows for the convenient use of larger, industrial sized spools and thread cones. The dual vertical guides make twin needle set-up easier as well as the quick change of threads for thread painting.

October 2017 Event Schedule
