

Janome Cover Pro 200CPX

This is a 3 needle cover hem machine that sews much like a regular serger. It comes with an instruction manual, accessories in a case, plastic over and the foot control. It is very easy to use and offers a professional finish. This machine does an exception finish on knits. It is a great addition to your sewing experience for that extra professional look to finish a garment or project that a sewing machine does not provide.

Asking \$800
