BERNINA PRESSER FOOT

#74

ADJUSTABLE GLIDING CUP FOOT

Adjustable Gliding Cup Foot

Perfect for free-motion quilting

Unobstructed view of the material

Adjust the height of the foot to the fabric

Inner markings for perfect placement

Glides over bulky seams

- ▶ Quilting around raised or dimensional elements of your quilt is easier than ever with the help of the Adjustable Gliding Cup Foot #74.
- ▶ Smoothly glide over lifted or uneven edges of embellishments and appliqués.
- ▶ The transparent cup allows for clear sight lines to the needle and fabric giving you more control over the creative process.

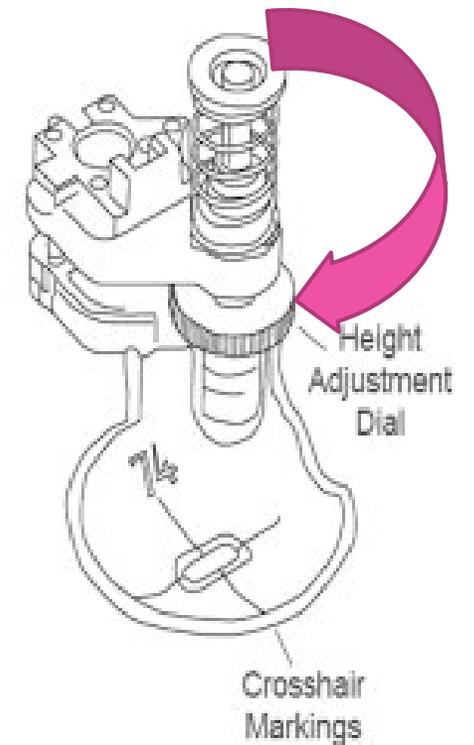

Adjustable Dial

You can adjust the foot to suit the thickness of your quilt. The sole should sit just above the fabric, with enough room to glide over it.

Not stitching correctly?

- If the height is too high, thread loops and/or skipped stitches may result and flagging may occur.
- If the height is too low, the foot will sit on the quilt, and you will not be able to easily move the fabric as desired.

Setting up your machine

- ▶ Lower your feed dogs
- ▶ Confirm the presser foot selection on your machine
- ▶ Straight Stitch/Cutwork plate for optimal results (set up your choice in the security program)
- ▶ Select straight stitch and needle down
- ▶ Lower your presser foot presser (to 0 or lower) to minimize the up and down motion.
- ▶ Lower the presser foot and then adjust the height of the presser foot sole so that the fabric moves freely. No resistance!

- ▶ NOTE: a zig zag stitch can be used with this foot for applique or thread painting. Max stitch width of 5 mm and be sure to match your stitch plate to your stitch

Tips

01

With the Q Series, select the quilting mode «BSR1» or «MAN».

02

If skipped stitches occur, reduce the presser foot height or the sewing speed.

03

For a beautiful stitch formation, use the same thread quality and color as upper and bobbin thread.

More adjustable sole options

Foot #72 or 72S

Foot #73
