

EMBROIDERY on the FRONT of the BAG is an APPLIQUE

If you wish to decorate the front of your bag, as I did the sample, you should stitch the embroidery in advance, on a coordinating fabric. It can then be appliqued to the front fabric before cutting that front panel. I will provide the applique frame embroidery file that can be used to stitch your chosen embroidery design to the front of the bag. It needs to be stitched on before construction of the bag. The embroidery design you choose, to fit within the frame, should be not more than 6 $\frac{3}{4}$ " wide by 5 $\frac{1}{4}$ " high. The embroidery file is a vp3 format. If you need a different format, I can convert it.

Note, please, that I am NOT providing the embroidery design, only the frame that will stitch your embroidery to the bag fabric.
