

A

**Framing Template for 70" circle**  
 Makes a 72" Square

Print out the pages, making sure your print is adjusted to print to scale.  
 Carefully cut out your template pieces, except for the red lines.  
 Overlap the pages to align the red lines exactly.  
 Tape the pieces together.  
 Measure the top straight line to check for accuracy.  
 The measurement should be 36 3/4".  
 This shows you've printed the pages to the correct scale.  
 Cut 4 pieces from your framing fabric.  
 Turn the paper over and cut 4 mirror image pieces.  
 Sew the 8 pieces together to make the frame.  
 Pin your frame to the circle.  
 Sew the frame to the circle with the frame piece on top of the circle and the circle on the bed of the sewing machine.
