

Squedge 18 Freezer Paper Template

Measure the pieced block. (It should be approximately 16½" square.)

Freezer paper usually comes in a roll, 18" wide.

Tear off *about* an 18" x 18" square.

1. Measure from the straight edge your block width. Draw this line.
2. Measure along the straight edge your block width. Mark the distance.
3. Connect the lines.

Cut the paper template, cutting exactly on the drawn lines.
