

Frames

Frames of all sizes and shapes look like they belong as a set when they are painted the same color. When purchased, these picture frames were silver, gold, black, and red. But with a little spray paint, they are all part of the same family. Use a spray paint that is suitable for metal or wood, then group the frames with a vase or other item to complete the display.

WHAT YOU NEED

Purchased picture frames in various sizes and styles.
Spray paint suitable for frame type
Waxed paper
Photos

WHAT YOU DO:

- 1 Remove the glass from the frames. Lay on waxed paper. In a well-ventilated area, spray the frames all the same color. Let dry.
- 2 Crop the photos to fit inside the frames and place in frames. Group the frames on a ledge or table.
