

# Carole Lyles Shaw

## Fibonacci Quilt #1

This one-day workshop is a surprisingly easy approach to modern quilting using just a few basic blocks. Block sizes are based on the Fibonacci sequence, a number series common to many things in nature. Bring your creativity, but don't worry about the math—I've done it all for you!

In this workshop, students will:

- Learn options for fabric selection and placement
- Learn a fast way for improvisational piecing of a center block, as shown in this sample quilt
- Develop confidence for intuitive design and piecing, alternate grid layouts, and negative space.

Project sizes: 69" x 69"; placemats and table runner options included.
