

"Mr. Bunny"
completed size: 9" on point

Fabric Requirements:

- ~ 9 1/2" square of background fabric
- ~ scraps of red, blue, yellow, pink, and brown for Mr. Bunny himself
- ~ fusible web (enough for Mr. Bunny)
- ~ thread to match

This pattern is for the block only. The fusible web appliqué method was used. Instructions will be given on how to do fusible web appliqué. Any other type of appliqué method may be used though.

Fusible Web Applique:

Trace all the pieces of the hen on the backside (smooth side) of the fusible web, making sure to leave at least 1/2" between pieces. *** Cut pieces apart, but DO NOT CUT ON THE DRAWN LINES. *** You will be simply cutting around the piece for now.

Once all the pieces are cut out, iron them onto the back (wrong side) of the fabric being used for that particular piece. (IE. Yellow for the flowers). The smooth side of the fusible web is up when ironing onto the fabric. Once all the pieces are ironed or fused to the fabric being used, cut the pieces out. This time you will be cutting on the drawn line. It's alright if you aren't exactly on the line when cutting out your pieces. This will just add more charm to your quilt.

When all the fabric pieces are cut out, take a pin and scratch the paper backing of the fusible web. This will help in removing the paper backing easier. Once it's scratched, simply bend the piece and the paper should separate. Now remove the paper backing.

Position the pieces onto your background fabric. DO NOT IRON UNTIL YOU ARE COMPLETELY SATISFIED WITH THE PLACEMENT. Once you are satisfied with the placement of the pieces, fuse them into place following the manufacturer's directions (which can be found on the instruction sheet that came with your fusible webbing when you purchased it).

Once fused, stitch in place using a satin stitch of choice or any other decorative stitch of choice. Using freezer paper on the back as a stabilizer helps this stitching come out really nice. Just cut a piece of freezer paper out big enough to cover the entire appliqué piece. Place it shiny side up on the ironing board. Lay your block on top of it, right side up. Make sure the design, or area you are appliquéing, is centered in the freezer paper. Set the iron on the block until the freezer paper sticks to the back of it. This should take only a few seconds to do. Once all of the stitching is done, simply remove the freezer paper from the back of your block. Eyes, or other details, that are not appliquéed on can be added after the appliqué is finished.

**Note: The flowers in Mr. Bunny's flower pot was done using Broderie Perse. For this method, you will need a fabric that has a nice flower print. Choose the flower that you would like to use and loosely cut around it. Cut a piece of fusible web the approximate size as the flower and fuse to the back of the flower. Now, carefully, trim around the flower so that all you have is the flower itself. Peel the fusible web backing off and place where desired. Once you are happy with the positioning of the flower, fuse in place and satin stitch over the raw edges. **

~Now your block is finished and ready to be put into a quilt. Although this pattern is for a single block, a couple setting ideas for a small quilt or wall hanging will be given. These can be printed out and used as a guideline if so desired.

This layout is for a small quilt that will measure approximately 45" square when complete. The sashing and inner border are approximately 1 1/2" wide (finished). The outer pieced border is approximately 6" finished. These are just estimates. The quilt may come out larger or smaller depending on how wide the sashing and borders are.

This layout is for a small quilt that will measure approximately 45" square when complete. The sashing and inner border are approximately 1 1/2" wide (finished). The outer pieced border is approximately 6" finished. These are just estimates. The quilt may come out larger or smaller depending on how wide the sashing and borders are.

This layout is for a small wall hanging that will measure approximately 24" square when complete. The inner border is 1" finished. The pieced outer border is approximately 4" finished.

These are just a couple of possible quilt layouts for the Mr. Bunny block. This block would also look nice on the front of a tote bag, pillow, or table runner.

Enjoy!!
