EQ8 For Beginners

Teacher: Jerry Petersen

This class will teach the basics of this powerful design program. You will learn how to use the program tools to create your own quilt designs using EQ's extensive libraries of blocks. Explore horizontal or "on point" block settings. Have fun with color and get ready to make your own designs come alive. Some basic computer knowledge required.

This class is oriented around hands-on practice. Please bring a computer with EQ8 already installed to class as there are in class exercises to practice new skills. Be sure to run it at least once to activate the license. An external mouse is also recommended, but not required. If you need help installing your program, please contact the instructor before class.

No other supplies are necessary. The instructor's computer will be used for demonstration and will be projected on a screen during class. At the conclusion of this class you will understand all of the basic operations of EQ

This class is open to EQ8 users only. EQ8 has a completely different user interface than EQ7.

If you have any questions or concerns regarding this class, please contact the instructor, Jerry Petersen, by email or at either the following number:
