

GIRL GANG – AKA GIRLS JUST WANT TO HAVE FUN

Getting Started, Things to Think About, Things to Bring

First and foremost, remember this is a serendipitous ride – one decision at a time making use as much as possible of your fabric stash. We will begin with discussion and decision making on your pattern of choice. Don't worry, we will definitely help with this process with plenty of options presented at our first meeting if you don't have something in mind. First meeting will include color and fabric considerations.

Once the pattern is chosen, collect your “inspiration pile”. DON'T PANIC. Consider the following in building your fabric palette:

The color wheel can suggest color combinations, then select and build from there. Or

Pick a multicolor fabric – large or small scale print, a plain or stripe and build from there. This selection may not have every color you will eventually use, its just a place to start.

If you have decided on a definite project, bring the pattern and some fabric options to our first meeting. Depending on your pattern and method of construction, bring the usual sewing supplies and machine if you think you will be prepared to start stitching.

Don't forget your sense of humor and sense of adventure – just be ready to have fun.
