OESD and Long arm quilting are a match made in heaven!

OESD has launched a new website focused on quilting designs and thread. Last summer, OESD introduced a quilting thread called the Perfect Quilting Thread. This thread features a polyester core wrapped with cotton, combining the strength of polyester and the resilience of cotton. It is 50 wt and available in 1000m and 3500m cones. There are 50 colors currently offered, with additional colors planned for the future.

Amanda Murphy tested the thread and collaborated with OESD prior to its release. We have beautiful samples made with this perfect thread, so stop in and see them on your next visit.

OESD has released an update to its quilting designs. Renowned for its exceptional high-quality embroidery designs, OESD has successfully extended this quality to its quilting patterns. Through collaborations with prominent fabric designers, OESD provides unique quilting designs that enable enthusiasts to coordinate quilt fabrics with designs from preferred designers or use cherished patterns. OESD offers edge-to-edge, pantograph, and custom quilt blocks in a diverse array of designs. These patterns can be utilized on both domestic machines and automated long arm machines. Additionally, OESD provides various file types compatible with different machines, including BQM files specifically for Bernina Q machines, ensuring that high-quality quilting designs are right at your fingertips.
