**BERNINA Echo Quilting Clips**

Installing and removing the Echo clip must only be carried out with the presser foot removed to prevent machine and foot damage.

Here are few hints for the installation and removal of the clip.

**Installation:**

Line up the clip with the foot and push down the foot as illustrated.

**Removal:**

Hold the foot and the disk as illustrated and twist off the disk.

In some cases the disks are a bit harder to remove and also to install.

Please do not force the disk on and off the foot as damage to the foot could occur. Simply use a dull blade i.e. Screwdriver and open the clip for removal and installation.
