

## Easy OutLine Appliqué Technique by Quilted Frog

Use the materials list and cover photo for color placement. Use a lightweight fusible web of your choice; however make sure that it has a paper carrier on one side. \*\*\***Follow the manufacturer's instructions for fusing.** Use a press cloth to protect your iron from glue residue. Use a Teflon appliqué sheet on the ironing board when assembling appliqué units.

### A. Tape pattern pages together following the diagram in the pattern.

Use the pattern to make the appliques using the Easy outline appliqué instructions. All patterns are printed in reverse so they will be the same direction after completing the appliques as in the photo. Notice that the OutLine Appliqué pattern is printed with heavy black outlines.

### A. Put the pattern page right side up on the table. Lay fusible web with the paper side up over the pattern page. To make a black silhouette for the base of appliques, trace around the complete shape of the design on the **OUTSIDE** edge of the outline. Trace each shape in the applique. Remember, if one section of the picture touches another section of the picture, both sections are part of the same applique.

Fuse the shapes you just made to Black fabric. Cut out carefully to form bases for the appliques.

### B. On the printed pattern number each section of the applique designs. Put the pattern page right side up on the table.

Lay fusible web with the paper side up over the pattern page. Trace carefully **INSIDE** the black lines of each pattern part. Tracing on the inside of the heavy black outline will automatically create a space between each shape when the colored pieces are fused to the black applique base. Trace pattern parts for each applique. Write each section's number inside the piece as you trace it.

Carefully cut between the lines you drew to separate the sections of the appliques. Fuse each piece to the correct color of fabric. Use the cover photo and materials list as a guide. Carefully cut out each section along the pencil line.

### C. Place cut out colored sections on top of each black silhouette shape, leaving space between pieces to form the black outlines. Trim edges of colored pieces if necessary to create a distinct outline. Refer to the photo to be certain colored pieces are correctly placed. Fuse colored sections in place following the directions that came with the fusible web. Peel paper backing from completed appliques.
