

Pfaff Pfeatured Pfoot #5  
Multi-Line Decorative Foot

**What's It For?** The Multi-line Decorative Foot is indispensable for keeping rows of decorative stitches evenly spaced and perfectly parallel to each other (if your machine has a selection of decorative stitches that you never use, now is the time to start!). The Multi-line Decorative Foot can also be used as a guide when sewing Maxi stitches

**What Makes It Special?** The Multi-line Decorative Foot is made of clear acrylic for excellent visibility and is clearly marked (both vertically and horizontally) in 1/4" intervals. Use the vertical markings to keep your stitches straight and the horizontal markings to accurately turn corners. Underneath, the foot is grooved to accommodate a wide variety of decorative and satin stitches. IDT is not engaged while using this foot.

**How Do I Use It?** Start by drawing a line with a temporary fabric marker (Frixion pen, chalk pencil, wash-away liner, etc) where you want your first line of stitching to be. Disengage your IDT and install the Multi-line Decorative foot. Put a piece of tear-away stabilizer under your fabric, align the drawn line with the centre mark of your foot, and start to sew, keeping the stitch centred on your drawn line. This is your base line of stitching.

For the next line, decide 1/ if you want to sew to the left or right of the original stitches and 2/ your desired spacing between lines. Vertical lines are drawn 1/4", 1/2", 3/4" and 1" to both the left and right of the centre mark so you can place them as desired to use as a guide for stitching this and subsequent lines.

This foot is also great when sewing maxi stitches, if your machine offers them. Because it is 2" wide, it offers excellent support as the fabric moves from side to side. As before, just draw a guide line and keep the vertical lines parallel to it as the maxi stitch progresses.
