1300MDC **BERNINA⁺**

The new BERNINA 1300MDC makes creative sewing easier than ever before! Let yourself be inspired by this overlocker's wide range of stitches. The additional coverstitch opens up a whole new dimension in sewing. Enjoy the wealth of luxury features which will make sewing and overlocking even more of a pleasure – especially the new, patented *mtc* thread control for the perfect seam at the turn of a knob. What's more, you can even save your personal settings on the LCD.

Inspirational variety

Rolled-hem lever

Simply flick the rolled-hem lever to switch effortlessly to a rolled-hem stitch and back again, with no need to change the stitch plate or presser foot.

Needle-threader

The practical manual threading tool for quick threading.

LCD screen

The clear display tells you both the personal and default basic settings of the stitch variants. You can also read the recommended basic thread tension here, as well as save personal settings.

Patented swing-out presser foot

Simply swing the foot out to the side to give yourself plenty of space for easy threading and hassle-free needle change.

Front foot lift system

The front foot lift gives an additional lift to the front of the presser foot, making it possible to accurately position multiple layers of fabric and bulky projects such as hand-knitted jumpers underneath it.

Threading (Lay-in) System

The BERNINA lay-in system lets you thread quickly and directly at all times. Thanks to the automatic lower-looper threading system, it's also a cinch to thread the lower-looper.

mtc knob

Thanks to the patented *mtc* thread control, it's finally possible to directly set the over-edge thread length and achieve the perfect seam at the twist of a knob!

Safety switch

The safety switch is activated as soon as you open the looper cover or the fabric support plate, thus preventing the accidental operation of the serger during e.g. the threading process.

Professional knife drive from above

Provides the greatest, most robust cutting force. Even thick fabrics won't deflect the upper knife – so all fabric edges can be trimmed safely and professionally.

Differential feed

Stepless differential feed ensures wave-free seams in knits, and prevents puckering in fine fabrics – at the same time allowing deliberate gathering.

Handwheel position indicator

Easy, ergonomic operation: With the aid of the vision panel and the red position indicators, you'll find the ideal threading position for the needles and the lower looper straightaway.

Accessories in the looper cover

Here you'll find the most commonly used accessories, neatly arranged and ready-to-hand.

Swing-out upper-knife arm

The upper-knife arm can be quick-released effortlessly at the press of a button to provide more room. This is particularly advantageous when, for example, you're working in coverstitch mode, or do not wish to trim the fabric edge.

Elasticator foot

The elasticator foot guides and stretches the elastic. Ideal for lingerie, bath- and sportswear, home textiles, etc.

Blindstitch foot

The blindstitch foot features an adjustable lateral guide plate which takes the hard work out of sewing blind hems. Suitable for blindhemming, flatlocking and heirloom techniques.

Coverstitch foot

This special foot can be fitted for absolutely flawless coverstitch seams. Suitable for seams, hems, bindings and decorative applications.
