

BABY LOCK SEWING ACCESSORIES

Straight Stitch Foot

(ESG-SSL)

Instructions

The Baby Lock Straight Stitch Foot is perfect to reduce puckering on lightweight fabrics or to prevent heavy fabrics from “jumping” and is designed for the center needle position. The small opening on the foot provides support for the needle as it travels through the fabric and needle plate.

MACHINE SETTINGS

Stitch:	Straight stitch
Needle position:	Center
Stitch width:	3.5mm

Tip: To prevent puckering on fine fabrics, use a fine needle, size 70, and a short stitch length. For heavier fabrics, use a heavier needle, size 90, and longer stitches. By lengthening the stitch you will prevent waving and skipping of stitches.
