

# HALLOWEEN TRAIN--EMBROIDERY

## Supply List

This is a fun design to work with, and you should be able to complete most of the embroidered appliqué during the class. The design will be loaded onto your machine or USB when you come, as it is from Acu-Quilt Go and we will pay them--please have \$10 ready to pay for that if you can.

- Bring: Embroidery Machine with unit and embroidery foot and power cord
- Hoop--8" square or 8 X 12 minimum
  - USB for design transfer
  - Fabric for background--you can use one long piece as I did or do each "train car" on a separate piece and sew together after stitching
  - Backing for fabric such as Shape Flex to prevent puckering
  - Stabilizer--Tear away or No Show Mesh  
(topper not necessary as the design is appliqué)
  - Embroidery Bobbin
  - Embroidery Threads for train design (refer to photo)
  - Basic sewing supplies including ruler and fabric marker, scissors etc

-Fabrics for appliqué--we will cut your fabrics on our "GO" during the class if you want--just have them pressed and fused with fusible web (Heat & Bond Lite or something similar). If not, you will use the traditional "Tack and Trim" method of machine embroidered appliqué--either is fine!

I will share how to "finish" your project in the class--for a runner, pillow or whatever you choose. I added the black rick-rack as a train track look.
