

## LUMINAIRE HANDS-ON SUPPLY LIST

This class is for newer owners or those needing a “refresher”. It is a free class if your machine was purchased here. We will review settings and basic techniques and functions. This is not a project class, but a “how-to”.

Bring your machine if possible with the embroidery unit and accessories. We will not do much stitching, but “play” with the buttons and features. We will also touch on Design Center, but just a quick look, as there are other Design Center classes on the schedule.

If you plan to audit the machine class and just watch, that is fine, but you will not gain as much as you would with the machine here. We understand how difficult it is to bring it with you.

This machine is amazing, and we want you to love it to it’s potential!!
