

CHRISTMAS CARDS

SCAN N CUT PAPER PROJECT

This is an easy project for a Christmas card. The pattern we will be using is one I put together from a YouTube I found and is free. I'm hoping we will have time to do more than one card in class. I will supply most of the supplies you will need, including the embellishments for a \$10 kit fee paid to Teresa at the time of class.

Bring to class:

- Brother Scan N Cut machine with power cord and accessories
- Low Tack or Standard cutting mat
- Painter or Drafting tape
- Turquoise Blade
- Spatula and Stylus
- Scissors
- USB drive for files

Here is the project we will be working on.
