

Free Standing Lace Supply List

Hello, we will be making a basic free standing lace item. The choice will be yours. I have 4 designs to choose from (1) to begin with. Or you can bring your own design already loaded on your USB stick. Please be sure that it is a flat single design. This is a quick and simple project to get started making ornaments for all kinds of things, and even small jewelry.

You will need :

Water Soluble mesh stabilizer.

At least 2 full bobbins, the same color as the embroidery thread

Embroidery hoop: 4 x 4 to a 5x7 (for the designs I will have to choose from)

Or you can make a bigger design if you have one.

New needle in your machine. I used a purple needle with no issues

Have several pieces of your water soluble stabilizer cut for the hoop you are using. Each hoop will need the minimum of 2 layers.

Embroidery Machine with power cord, new needles, coordinating threads that will be used

Embroidery arm, scissors

design on a USB stick if you are not using one that I have. Make sure that your USB stick only has the design that you will be making on it.

Any snacks that get you thru this.

Thank you—for questions contact Mary McCright through Richland Sewing Center
