

# Collage Workshop—Supply List

-**Purchase Collage pattern** of your choice from RSC at class discount. (lots of patterns available) I recommend a “simpler” or smaller pattern to start

--Bring a variety of background fabrics—the “mixed” background is fun, and newsprint fabrics work very well. -Florals ( various sizes and colors) for cutting designs—it takes a lot of variety.

--Fusible Fleece the size of your project (not at first class)

--Steam a Seam 2 at least two yards

*If you want to trace your pattern onto Pattern Ease Foundation to make reversal easier that is fine—I do not use that method—but do recommend using a light box —I will have some in the classroom*

----Basic supplies: (scissors, ripper, marker etc)

---Applique pressing sheet-bring the larger size if your project is larger

---Thread for stitching background and border pieces at first class

---Sharp serrated edge scissors ( Karen Kay Buckley medium blue handled scissors or the little green ones—all are great!)

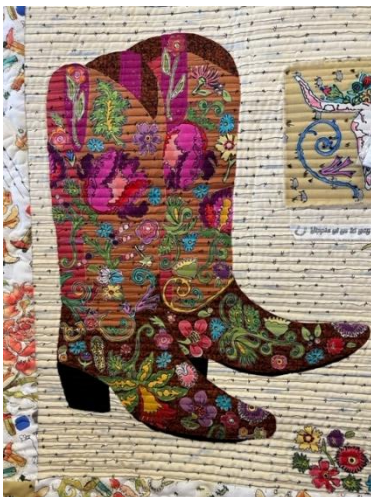

--black sharpie pen

--Sewing machine with power cord and ¼” foot

--Ruler and Rotary Cutter

*To prepare for class you can pre cut some of the florals by ironing Steam a Seam 2 fusible to the back of flowers and cutting them out. It takes lots of flowers to create the collage. Read your pattern back for an “idea” of what to bring.*

--In the first class we will build the background and begin the collage process.

If you are already started on a project--come to continue the process!! Other student’s help and opinions are great during classes—as well as “sharing” fabric cuts.

The boot is my latest collage and I will have others for you to see! My “chicken” is “in progress”!
