

#12 Scarf for Seahawk Fans

Designed by Anna-Beth at our Northgate store

Get your 12 on and stay warm at the same time!

What You'll Need

- 1/3 yd each fleece in navy and lime
- Thread to match both
- A sheet of template plastic
- Scissors with a sharp point
- Pen-style chalk marker
- Temporary spray adhesive, such as 505 spray
- Rotary cutter, mat and ruler
- Sewing machine with walking foot or dual feed

How to Make

1. Trace the white part of the 12 (see next page) onto your template plastic.

2. Carefully cut it out so it can be used as a template.

3. Lightly spray one side of your lime fleece with adhesive. Carefully layer your navy fleece on top.
4. Trim off one long edge as little as possible so the edges are aligned perfectly. Do the same on the other side. Trim the short edges a bit too, so you now have a two-sided piece about 11" x 59".

5. Cut a long 2"-wide strip off the side. Cut it into 6" lengths, then cut each length into 1/2" fringe, leaving the top 1/2" uncut to hold it together.

6. Load your sewing machine with lime thread in the bobbin, navy on the top. Sew your fringe pieces together along the uncut edge so you have a length of fringe approximately 18" long. Cut in half for two 9" lengths.

7. Insert the fringe between the layers of one short edge with the lime side of the fringe showing on the navy side of the scarf. Sew across that end, catching the fringe in between your layers. When you reach the corner, turn and continue stitching along the long edge. Repeat fringe on other short edge and continue stitching along the other long edge. Your scarf is now whole and ready for the 12!

8. Center your template on the end of your scarf, navy side up.

9. Use your chalk marker to trace the 12.

10. Shorten your stitch length slightly and carefully stitch just on the outside of your chalk markings.

11. Take your sharp scissors and CAREFULLY poke through only the navy fleece inside the numbers.

12. With great care not to cut through the lime fleece, trim away the navy numbers as close as possible to your stitching. Also be careful not to cut through your stitching!

13. Pick away all the lint and toss in the laundry to wash away the remaining spray adhesive.

Wear with pride!
