

After importing a screen layout or using screen designer, entering or scanning a barcode number or part number will no longer work to enter an item into an order.

Use the following procedure to fix this issue:

- 1) Go into Edit->Screen Designer->Edit Properties.
- 2) Click the + sign next to "Orders".
- 3) Scroll down and highlight "OrderEnterButton".
- 4) On the right hand side of the screen, make sure that the "Visible" checkbox is CHECKED.
- 5) Click "Ok", then answer "Yes" when asked "Permanently save changes?".
