

Can I change the margins when printing HTML reports from TRS?

You can't change the margins if you're using TRS's built-in, but if you are using a web browser to view the reports, you can in most cases.

To switch to using the web browser, select Edit->Preferences from in TRS. Check the box labeled, "Use Windows Default Web Browser for HTML Reports?".

Now, when you run a report, it will come up in your web browser. From there, you can change the margins in most web browsers by selecting File->Page Setup.
