

Inventory Summary can be run as of a previous date in TRS 10 and later, but only so far back.

Starting with TRS Version 10, the Inventory Summary Report can be run as of a previous date. When you run the report, you will be prompted to enter the date as of which you would like to run the report. TRS versions 9 and earlier do not have this feature. If you have upgraded to version 10 from a previous version, be aware that you cannot run the report as of a date prior to when you upgraded to version 10. Attempting to do so will only generate data as of the date you installed version 10. This is because prior to version 10, TRS did not track changes to inventory levels, so the log entries necessary to recreate past inventory levels will not exist. For example, if you installed version 10 on 2/1/2009, you can run the report for any date of 2/1/09 or later. But, attempting to run it for 12/31/08 will give you the same data as running it as of 2/1/09.
