Water Line Material Survey

The City of Uintah is requesting your assistance with creating a water line material inventory. This inventory is part of the Lead and Copper Rule Revisions from the Environmental Protection Agency. Your assistance will help the city determine future treatment needs and system upgrades. We appreciate your help! Uintah City is offering **\$10.00 off your water/utility bill**, if you return this survey **filled out by January 31, 2023**.

Water Service Line Material: Identifying your service line material can be challenging. Sometimes there are building records with the house that identify the pipe material. Sometimes records are lost, and physical inspection of the service line is necessary. You will need to locate where the service line enters your house. This may be in a basement crawlspace or under the skirting of a trailer.

Below is a guide to identifying pipe material.

<p>Types of water pipes</p> <p>Follow the guidance below or contact a licensed plumber to determine the material of your water pipes. To identify the material of your service pipe material on private property, check your household water service connection, typically located in the basement.</p> <p>Homeowners should identify and replace old household pipes, particularly galvanized plumbing and sources of lead. The type of household plumbing can vary throughout your household.</p>	<p>Lead </p> <p>A dull, silver-gray color that is easily scratched with a coin. Use a magnet - strong magnets will not cling to lead pipes.</p> <p>Galvanized </p> <p>A dull, silver-gray color. Use a magnet - strong magnets will typically cling to galvanized pipes.</p> <p>Copper </p> <p>The color of a copper penny.</p> <p>Plastic </p> <p>White, rigid pipe that is joined to water supply piping with a clamp.</p>

Water Line Material Survey

Name: _____ **Phone Number:** _____

Email: _____ **Property Address:** _____

Landlord's Name and Contact Information (if applicable):

Based on records or appearance and testing of your service line, please select the material:

_____ Copper

_____ Plastic

_____ Lead

_____ Other

_____ Galvanized

_____ Unknown

Water Service Line Installation Date: Please provide the date of the installation of your water service line. If you don't know the date of the service line installation, please provide the date of construction of the house or building.

Information Source: Please tell us how you determined your water service line material:

_____ Visual Inspection

_____ Lead Test Kit

_____ Scratch Test

_____ Plumbing Records

_____ Other

Photograph: Pictures can be greatly helpful when identifying pipe material as well as providing records. Please send a photo of your service line to b.woodbury@uintahcity.com or attach it to this survey. If you choose to email the picture, please include the address of the house or building served by the service line.

If you have more than one house, please make copies as needed.
