

## The Star Christmas ornament

This is a revised ornament pattern. The original can be found on the web site [Threadbarecreations.blogspot.com](http://Threadbarecreations.blogspot.com).

Her version is a sew and turn out pattern. I converted it to a fused star.

My directions are as follows:

1. Make a paper template of the pattern on freezer paper. Cut out.
2. Fuse 2- 6 inch squares of Glitzy Christmas fabric together with the wrong sides facing each other.
3. Press the paper template to either side of your square and cut out pentagon shape.
4. On the square transfer the inside lines to you shape. Note the inner lines intersect at the middle points of the larger pentagon.
5. Fold on the inner line and press in place. You will see the star design. Clip folds in place.
6. Create a loop from ribbon or cording and place it just under one of the fold at the edge of the ornament.
7. Stitch the edges of the folded points catching the hanger in place.
8. Your ornament is finished.
