

# TMI FLASH LITE

Adds Wireless Connectivity & DICOM to imaging systems

Small size  
Big connectivity!

- Compatible with all imaging systems with an RJ45 jack
- Adds wireless DICOM connection to a facility's wireless network
- Plug and Play connectivity
- Small size: 3.5" x 2.8" x 0.8"
- Encrypted transmission
- One year full replacement warranty

## TMI FLASH LITE

By connecting your imaging system wirelessly to your DICOM network, TMI FLASH LITE can help reduce the storage intervals of images obtained during a procedure.
