# Longarm Quilting Services/Pricing

---

## Services

All of our longarm quilting services are completed on "Sewfie" our Gam-mill Optimum longarm machine with Statler Stitcher. The Statler Stitcher utilizes computer hardware and software to guide "Sewfie" in creating state of the art stitch and design precision. We are currently offering Edge-to-Edge (E2E...also known as Pantograph) services only. E2E is a single pattern used on the entire quilt top. We have a wide selection of quilting patterns and designs to choose from.

We ask that you call the shop for a **Quilt Check In** appointment. Appointments will last approximately 10-15 minutes. During this time we will work with you to help you choose a quilting design and thread that will help to create your treasured quilt. Quilts may not be dropped off without an appointment. This is for your own safety and that of your quilt! We would hate for one of your beautiful creations to go missing!

## Pricing

The price of your quilt is determined by the size of your quilt top in square inches. Measure the width and the length and multiply those two numbers for the square inches. As an example, if your quilt top measures 60" x 70" then your quilt is 4,200 square inches. At our rate of \$.0275 per square inch, your total cost would be \$115.50. This cost includes thread but does not include the cost of batting. Minimum longarm fee is \$50.

## Batting

We offer Warm and Natural (100% cotton), Hobbs 80/20, Quilters Select & 100% Wool batting at a discounted price to those using our Longarm services.

## Quilt Prep

Our goal is to provide excellent service with a quick turn-around time. In order to do that you will be responsible for making sure that your quilt is flat, the threads trimmed, etc. Should we determine your quilt is not quiltable and rather than incur extra expenses to you we will return your quilt to you to make the necessary adjustments. Please refer to the following checklist before calling for a quilt check-in appointment.

- Check to make sure seams are secure. If you have a quilt top with bias edges or "piano keys" on the border, please stay stitch the outer border.

- Have seams pressed well and be sure all threads are clipped (unclipped threads will show through after being quilted!)
- Indicate the top and bottom of the quilt and backing if it's directional.
- Quilt top **MUST be squared** and lay flat. Measure your quilt across the top, bottom, and at the center. If the outer edge is more than an inch or two bigger, you will have wavy borders which can result in puckers in your finished quilt. We will contact you to determine whether you'd like to fix it or trust us to quilt it with the least amount of puckers possible.
- Remove all pins, embellishments, etc.
- Quilt top & backing must be brought in as separate layers.
- Stitch your backing fabric with a 1/2" seam allowance and press seam open.
- Batting & backing must be 6"-8" larger than the quilt top and **squared**. Use a 90° ruler to verify.
- We will not accept sheets as backings.
- If your thread color choice is lighter than the backing it may result in the lighter color "poking" through on the back. Also, if your thread color on the back is darker than the front this may result in "pokies" on the top. It's best to use the same thread color on the top and in the bobbin. Keep this in mind when choosing your quilt backing.
