PLEASE- if you need a refresher on basic windows commands (or the comparable key strokes for an Apple computer) NO problem!!! We have to understand our computers to learn the features of our BERNINA Software.

What do you need to know includes: What's on the Windows screen, **where to find "stuff"** on the Windows screen (we need to be able to have folders for our V8 work, we will need to have easy access to our software icon to **launch the program**, and how to add the **"purge recovery"** trash can, how to find where the V8.1 designs are located, how to **add fonts** to 8.1 in the **control panel**, how to **make a folder**, understand the **difference between Save and Save As**, how to **download and then find** stuff, etc.
