

Quick and Easy Table Runner

15 ½" x 58"

Our table runner finishes at 15 ½" wide by 58" long. Measure your table and decide how long you would like your table runner to be. It is suggested that there be a 10" drop on each side, so measure your table and add 20" to determine your length. For ours we needed **1 5/8 yards of center fabric** and **1 5/8 yards of 2 side borders**.

Center Panel:

Cut *length of fabric center panel or focus fabric 8" wide by 58" long (or your desired length).

Side Borders:

Cut both side borders 4" wide by 58" long (or your desired length). We chose two different colors, but one color would work to.

Accent Flaps:

Cut both accent flaps 1" wide by 58" long (or your desired length). Fold flaps in half and press.

Sew the center panel, one accent flap and one side border, then repeat for the other side. **Voilà**, your table runner top is done. Add batting and backing, quilt as desired then finish by adding your binding.

*by cutting length of fabric you will have enough parts to complete two table runners.
