

Weight	5.5 lbs
Max Height	58.30
Min Working Height	4.75
Bowl Diameter	75mm
Folded length	23.7
Leg Segments	3, twist
Load Capacity	115 lbs
Leg Dia	32mm x 1.2mm
Leg Angle Locks	Yes (patent pending Titan Leg Lock System)
Detachable Legs	3
Configuration Options	Bowl Top, Flat Top & Telescoping Center Column
1/4-20 Accessory MNT	Yes
Tension Control Bowl System	Yes
Pitch Range	+/-20
Construction	CNC AL alloy, 32 mm x 1.2mm THK, 10 layer, diamond pattern carbon fiber legs with extended length O-ring sealed leg locks
Bubble Level	Line Level
Leg Twit Lock O-ring Seals	Yes
Locking Angles	25, 53, 80 deg
Leg Foot	3/8-16 Adjustable rubber foot w/ optional metal spike
Carry Bag	Tactical bag, with top load accessory pocket, end load leg pocket, internal leg tube extension pocket, 4 molie strips, handle & sling. Black
Warranty	5/10 yr

PRO Series tripods are a "start from scratch" redesign of the very successful BT Precision Series Tripod. Made in the USA for LE/MIL and PRS/LR competitive shooting applications, this is the strongest most vestal tripod in it's class.

The new patent pending "Titan Leg Lock" technology makes this a "one of a kind" design. This technology allows for both automatic leg angle adjustment or "bi-directional locked" angle positions for maximum strength and rigidity. Absolutely necessary for multiple round firing and quick location changes. The all new HD 32 mm dia x 1.2mm extra THK wall, 10 layer, diamond pattern carbon fiber legs provide maximum strength & rigidity. The new O-ring sealed-extended length twist locks make the legs twice as strong as the same size.

Pro Series legs are Ideal for Professional PRS/LR competitive shooting, LE/military sniper, high power spotting scopes, video, and long lens photography.

Combine the FPBT-LH Precision Bowl Tension handle and Arca Swiss F-Picatinny Lever clamp system to achieve the perfect shooting platform. Or convert to a flat top tripod or install the optional telescoping center tube Assembly to meet any application.

**MADE IN THE USA**
