

PRINTED INTERFACING

# MARINER'S STARBURST

The Mariner's StarBurst is a combination of two favorite Quiltsmart patterns: 58" Lone Star and Mini-Mariner's Compass. Both patterns individually are easy to make, and the combination is also easy! You will need the 58" Lone Star Classic Pack and the Mini-Mariner's Classic Pack. Cutting requirements are found in the packs. The following steps will show you how to combine the two patterns into one fabulous quilt!

Create a masterpiece with bright, high contrast fabrics!

## Yardage, Jellyrolls & Fat Quarters

Due to this quilt being a scrappy one, there is no exact amount for yardage. Use the pack yardage charts as a guide. The background yardage is the same as in the 58" Lone Star pack information. Cutting requirements are found in the packs.

**Helpful information:**  
58" Lone Star Jellyroll: One jellyroll strip yeilds about 7 rectangles. You will need 288, so a total of about 42 strips.

OR  
One fat quarter yeilds about 24-28 rectangles, so you need about 12 fat quarters. These numbers vary depending on the width of the fabric.

OR  
Your stash!

**Mini-Compass:**  
Use the information on the pack yardage chart as a guide. The compass does not work quite as well with jellyrolls as it does with fat quarters. Jellyrolls will work for the outer points.

**1** Using the 58" Lone Star Classic Pack, make all 8 diamonds, following instructions 1-17. *Tip: Use the yardage and cutting chart as a guide for the colors. We used 6 "colors"...but within each color are many different fabrics. For example, reds & pinks make up the fabrics for Fabric #1 forming the center of the star. Blues & purples make up the fabrics for Fabric #2, and so on.*

**4** Place the Mini-Mariner's Compass 8ths on the Lone Star Background triangle pieces. *Tips: 1) Lay the Long Cardinal Points alongside the Lone Star diamonds. 2) Take a photo with your digital camera or phone! 3) Work with one quarter of the quilt at a time, as shown above.*

**2** Using the Mini-Mariner's Compass Classic Pack, make 16 wedges (the equivalent of 2 Mini-Mariner's Compasses) following instructions 1-20 with these exceptions: a) In steps 14 and 18, it says to "Make 4" - but make 8 of each of those, for a total of 16 compass sections. b) In step 20 - do NOT sew the wedges together - just put the facing on each wedge. Now read on to step 3 before you sew...

**5** Taking one piece at a time, pick up a triangle and fuse the Mini-Mariner's Compass facing to the background triangle. Place a pin or two in the outer arc to secure that part to the background triangle. Stitch along the curve as in Mini-Mariner's Compass instructions, step 24. Place triangle back in position.

**3** You will be using half of the Mini-Mariner's Compass pack, - two compasses left over - great for wallhangings, tablemats, and shams. As shown above, lay the Lone Star diamonds and background triangles on a table, design wall or the floor.

**6** Sew background pieces as in steps 18-24 of Lone Star instructions. *Hint: Or - keep the pieces laid out and pick up each piece, sew right sides together with respective piece, and return to place).* We added a scrappy binding to compliment the scrappy Mariner's StarBurst.
