

## Fabric Wrist strap and d-ring tab

Lobster claw clasp and d-ring, any width between  $\frac{1}{2}$  inch and 1 inch.

### Material

Outer fabric – Strip 15" long and four times the width of your lobster claw and d-ring. Here for my  $\frac{3}{4}$  inch d-ring, I used a strip of fabric 3 inches wide.

Interfacing (Shape flex) – Strip 15" long and twice the width of your lobster claw.

Press in half along the long edge and fold the edges in to the center. Lay the interfacing down the center of the strip between the folded edges.  
Fold the edges in and press.

Fold in half again and slide on the lobster claw. Make sure you add the lobster claw BEFORE the next step.

Stitch the short edge together, closing the strap. Be careful not to twist the strap.

Edge stitch, moving the lobster claw around as necessary.

Top stitch the strap together near the clasp.

Make the d-ring strap in a similar way. Stitch across the raw (closed) edge of the d-ring tap to secure it while embroidering the design.
