Border Guide Feet

Having problems lining up or evenly spacing your border designs? Now the Border Guide Foot helps you to easily match up your border designs with the red lines of the foot. No need to mark every row beforehand! The secret to the border guide foot lies in the red guide marks. The two sets of vertical red lines are calibrated to allow perfect spacing of rows. The

horizontal red line matches the needle drop so you can line up the start of each row. The small red mark denotes the center of the design for lining up with the marking for the first row. (Perfect for this week's project.)
