

# Some Tips Before You Begin

## Here are some tips when printing your borders and tags:

1. You may want to do a test print on a regular sheet of paper before printing to the printable fabric sheet.
2. Try adjusting your quality settings under “Properties”. (See figure below.) See what settings work best with your printer.
3. The printables file on the disc contains two pages. The first page is the borders and pouch labels, and the second is the *optional* side pouch tags. You do not have to print page two if you do not want the side tag.
4. **When you choose to print, and the print dialog box pops up, be sure to select “None” for the page scaling option, or select “Actual Size.”** (See figure below.) **You do not want your printer to resize the graphics.**
5. Be aware that all printers print differently! We cannot guarantee an exact color match because of this.
6. Above all else, have fun!

*Note: The sample dialog box above is for my computer/printer. Yours may look different, but you will likely have similar options available.*

**Please note:** Because of the nature of this product, we cannot accept returns. We most certainly want you to be happy with the product. If you are having any problems, please let us know. We would be glad to help!
